

CONSTRUCTION ENVIRONMENTAL MANAGEMENT PLAN, MOUNT VUE ESTATE, MALENY

TALLOWOOD STREET, MALENY

CLIENT: WITHHELD

S5 Environmental was engaged to prepare a Construction Environmental Management Plan (CEMP) for Stages 5 and 6 of the Mount Vue Rural Residential Development located on the outskirts of Maleny. The 49 hectare site had been utilized as grazing land until the staged development of the Mount Vue Estate was planned and consisted of numerous paddocks, drainage line, waterways and dams.

As part of their Development Approval Conditions as site specific Construction Environmental Management Plan was required for Stages 5 & 6. S5 Environmental undertook a number of site inspections, reviewed engineering, landscape and stormwater management technical reports to gather sufficient data to populate a site specific CEMP for use during construction.

S5 Environmental personnel liaised closely with the project team ensuring coordination of technical requirements throughout the CEMP and provided advice and guidance to lot layout, waterway management and landscape design.
